SHANE SUNNY KOTTUPPALLIL

Associate DevOps Engineer | Site Reliability Engineer (SRE)

Bengaluru, Karnataka, India | +91 79073 75051 | shanesunnyssk@gmail.com
linkedin.com/in/shanesunnyssk | github.com/ShaneSunnyKottuppallil

PROFESSIONAL SUMMARY

DevOps / SRE engineer operating production infrastructure for a fintech platform serving 5+ banking clients. Skilled in Kubernetes, GitOps (ArgoCD), CI/CD with GitHub Actions, Infrastructure as Code (Terraform, Ansible) and HashiCorp Vault. Resolved **200+ on-call tickets** including **16 P0** and **14 P1** incidents across sandbox, UAT, pre-prod and production. Focused on reliability, automation, observability and secure, repeatable deployments.

TECHNICAL SKILLS

Cloud & Infrastructure: AWS (EC2, VPC, IAM, ALB, RDS, S3, ECR, EKS, Route 53, API Gateway, CloudFront), Azure, Terraform, Ansible, HashiCorp Vault, AWS CLI

Containers & Orchestration: Docker, Kubernetes, ArgoCD, Helm, OpenLens, GitOps

CI/CD & Automation: GitHub Actions, Jenkins, Git, GitHub branch governance / CODEOWNERS, Shell Scripting (Linux), Nexus

Observability & Incident Response: Prometheus, VictoriaMetrics, Grafana, Alertmanager, Kibana, Zenduty, Teleport, Slack integrations

Databases & Data: PostgreSQL, MySQL, MongoDB, Redis, ClickHouse, OpenSearch, data-warehouse / ETL pipelines

PROFESSIONAL EXPERIENCE

Associate DevOps Engineer · **Vegapay** *Sep 2026 - Present*

Fintech startup serving 5+ banking clients · Bengaluru, India | DevOps Engineer Intern (Mar 2026 - Sep 2026)

- Operated DevOps on-call for a multi-tenant banking platform and resolved **200+ tickets** (incl. 16 P0 and 14 P1 incidents) across sandbox, UAT, pre-prod, and production for clients including SSFB, Unity, YBL and BOB.
- Built an end-to-end, **Terraform-managed observability stack** on Kubernetes using Prometheus, VictoriaMetrics, Grafana, Alertmanager, Zenduty and Slack, enabling centralized monitoring and faster incident response.
- Designed **CI/CD pipelines with GitHub Actions** automating Docker image builds and deployments to Amazon ECR, reducing manual release effort by ~70% and standardizing Java 21 builds across clients.
- Managed **GitOps deployments with ArgoCD** on Amazon EKS; resolved pod crashloops, image-pull failures and sync issues, and tuned CronJobs and pod scaling for ETL and microservices.
- Implemented **Git branch & PR governance** (branch protection, CODEOWNERS, required reviewers, deployment restrictions), improving release reliability across repositories.
- Secured infrastructure using **Vault secret injection** and **Teleport-based SSH/DB access**, eliminating hardcoded credentials and reducing direct production exposure.

DevOps Engineer Intern · **Fi.Money (epiFi)** *Dec 2025 - Mar 2026*

Bengaluru, India

- Engineered an **ephemeral OpenSearch restore system**, cutting log-recovery time from ~3 hours to ~25 minutes (~85% improvement).
- Executed a **zero-downtime Prometheus upgrade (v2.48 → v3.7.3)** and resolved high memory usage, restoring monitoring reliability.
- Standardized CI/CD workflows with **Jenkins + Terraform** and automated infrastructure patching with **Ansible**, improving release consistency and uptime.
- Diagnosed and resolved **P0 production incidents** (disk exhaustion), improving system stability and availability.

DevOps Engineer Trainee · **BridgeLabz Fellowship** *Aug 2025 - Dec 2025*

SRM Institute of Science and Technology

- Architected a **3-tier AWS infrastructure** (VPC, EC2, ALB, RDS) simulating production-grade deployments, provisioned via **Terraform + Ansible**.
- Developed CI/CD pipelines using **Jenkins, Docker and Kubernetes**, enabling automated containerized deployments.

PROJECTS

FitnLive - AI Health Chat Platform

AWS, Docker, Kubernetes, Terraform, Ansible, Jenkins, Node.js, MongoDB, MySQL

- Built and deployed a containerized health chatbot on Kubernetes with a **Jenkins CI/CD** pipeline and AWS infrastructure provisioned via Terraform and Ansible.

Twitter Sentiment Analysis Data Pipeline

AWS (S3, Glue, Athena), PySpark, Google Cloud

- Built an end-to-end big-data pipeline processing **100+ datasets** with PySpark ETL, storing structured output in S3 and querying with Athena for sentiment dashboards.

EDUCATION

B.Tech, Computer Science Engineering (Cloud Computing) · **SRM Institute of Science and Technology** *Sep 2022 - May 2026*

- **GPA 9.49 / 10.** Department Topper among 900+ students; awarded a ₹61,250 Performance Scholarship.

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- GitHub Foundations Certification
- NPTEL: Cloud Computing, Database Systems, Computer Architecture

ACHIEVEMENTS

- Resolved 200+ production on-call tickets (16 P0, 14 P1) with high reliability.
- Department Topper (900+ students) & merit scholarship recipient.
