Education

B.Tech – Computer Science Engineering (Cloud Computing) Sep 2022 – May 2026
SRM Institute of Science and Technology Tamil Nadu, India

- **CGPA: 9.49 / 10**

Awarded **₹61,250 Performance Scholarship** as **Department Topper** among 900+ students.

Technical Skills

Cloud & Infrastructure: AWS (EC2, VPC, IAM, ALB, RDS, S3, ECR, EKS), Terraform, Ansible, Vault, AWS CLI
Containers & Orchestration: Docker, Kubernetes, ArgoCD, OpenLens
CI/CD & Automation: Jenkins, GitHub Actions, Git, Shell Scripting (Linux), GitOps
Observability & Logging: Prometheus, VictoriaMetrics, Grafana, Alertmanager, Zenduty, Teleport, Slack Integrations

Professional Experience

Associate DevOps Engineer (Sept 2026 -Present) | DevOps Engineer Intern (Mar 2026 - Sept 2026)

Vegapay – Fintech Startup serving 5+ Banking Clients | Bangalore, India

- Reworked **Git branching** and deployment governance by implementing **branch protection, PR validation,** and **deployment restrictions,** improving release reliability across repositories.
- Built an **end-to-end monitoring/observablity stack** using **Terraform, Kubernetes, Prometheus, VictoriaMetrics, Grafana, Alertmanager, Zenduty, and Slack** integrations for centralized observability and incident response.
- Resolved 202 DevOps on-call tickets (16 P0, 14 P1) across sandbox→production for 4 banking clients (Vegapay, Unity, SSFB, YBL) with a ~97% resolution rate.
- Ran GitOps deployments on **ArgoCD/EKS** and built **GitHub Actions CI/CD pipelines,** standardizing Java 21 builds and automating image publishing to ECR/Nexus.
- Delivered **new services end-to-end** (File Processor, CMS-Simulator, SFTP → ClickHouse) and administered PostgreSQL/MongoDB/ClickHouse across environments.

DevOps Engineer Intern

Fi.Money (epiFi) – Bangalore, India | Dec 2025 – Mar 2026

- Standardized CI/CD workflows using **Jenkins + Terraform**, improving release consistency across multiple repositories.
- Engineered an ephemeral **OpenSearch restore system**, reducing log recovery time from **~3 hours to ~25 minutes** (~85% improvement).
- Executed **zero-downtime Prometheus upgrade (v2.48 → v3.7.3)** and resolved high-memory usage, restoring monitoring reliability.
- Automated infrastructure patching using **Ansible**, reducing manual maintenance effort and improving system uptime.
- Diagnosed and resolved P0 production incidents (disk exhaustion), improving system stability and service availability.

DevOps Engineer Trainee

BridgeLabz Fellowship – SRM Institute | Aug 2025 – Dec 2025

- Architected a **3-tier AWS infrastructure** (VPC, EC2, ALB, RDS), simulating production-grade deployments.
- Developed CI/CD pipelines using **Jenkins, Docker, Kubernetes,** enabling automated containerized deployments.
- Implemented **Infrastructure as Code (Terraform + Ansible)**, ensuring reproducible and scalable environments.

Projects

FitnLive – AI Health Chat Platform (DevOps Deployment)

Tech: AWS, Docker, Kubernetes, Terraform, Ansible, Jenkins, NodeJS, MongoDB, MySQL

- Built and deployed a containerized health chatbot using Docker and Kubernetes.
- Implemented Jenkins CI/CD and provisioned AWS infrastructure using Terraform and Ansible.

Certifications

- **AWS Certified Cloud Practitioner**
- **GitHub Foundations Certification**
- NPTEL : Cloud Computing,Database Systems, Computer Architecture
- Coursera: HTML, CSS & JavaScript for Web Developers, Introduction to Databases
